Learning Management System (LMS)

The Learning Management System (LMS) is an effective tool for organizing and presenting curriculum materials, tracking student academic progress, and providing information about faculty members. All of the faculty members use cutting-edge technologies and teaching methods that are supported by information and communication technology (ICT) in the classroom.

At the beginning of the academic year, all Programs Students are given course plan, academic calendar, lesson plans, Question banks are made available in the library. As a result, students are completely aware of all their academic requirements and can plan their studies. The use of multi-media teaching tools such LCD projectors in classrooms and libraries with always-on internet-connected computers, laptops, etc. Power point presentations are frequently used in our institute to facilitate and improve students' conceptual learning. Institutional library has SyNchRonik software for using books and DELNET software for E- Journal. Faculty members create internal assessment recordings and keep track of students' progress during all phases of learning experiences.
